# WEATHERSTRONG OUTDOOR CABINETRY

# BACKYARD FUN BEGINS WITH A GREAT OUTDOOR KITCHEN

With the desire to spend more quality time outdoors, WeatherStrong Outdoor Cabinetry is designed with your lifestyle in mind. Our cabinets are manufactured in the U.S.A. using a 3/4" All-Weatherboard® composite material, with solid High Density Polyethylene doors and cover panels, designed to stand up to the harsh elements Mother Nature can send your way. Pounding rain, hot summers, and cold snowy winters are no problem. Your WeatherStrong cabinets are tough enough to take it!

All cabinets are factory built in a variety of sizes and they ship in 7 to 10 Days.

# THE WEATHERSTRONG DIFFERENCE

WeatherStrong Outdoor Cabinetry combines premium materials, each designed with durability, strength, and superior weather resistance to create the ultimate in weatherproof cabinetry.

- **1. DOOR:** Marine grade HDPE (High Density Polyethylene) is incredibly strong, durable, and long lasting in the most extreme weather conditions.
- **2. CABINET:** Each cabinet is built using light gray ¾" thick All-Weatherboard® composite material for weatherproof durability.
- **3. VENTS:** All base cabinet end panels feature vent slots to promote air flow through the cabinetry and to prevent any possible build-up from either a natural gas or propane gas leak. Matching base end panels are available, with inset mesh vent grills.
- **4. LEGS:** Base cabinets are shipped fully assembled, ready to be installed. The 'Sure Level' adjustable polymer legs are included with each base cabinet and are field installed. Each leg is rated for 330lb static load. Snap-on matching toe kick is optional for on-site modification and installation. Optional 2000lb static load marine grade stainless steel adjustable legs available.
- **5. HINGES:** Stainless steel, 6-way adjustable hinges ensure perfect door alignment and provide quiet, soft closing operation.
- **6. HANDLES:** Choose from a selection of marine grade stainless steel handles.
- **7. ADJUSTABLE SHELVES:** Each shelf is made from ¾" thick All-Weatherboard® composite material.
- **8. DRAWER BOXES:** Four sides and bottom panel is made from ¾" thick All-Weatherboard® composite material, with full extension, soft close, stainless steel side mounted ball bearing runners.

#### **CONFIRMAT ASSEMBLY**

To help ensure the assembly of strong cabinets, WeatherStrong counterbores the cabinetry panels and uses stainless steel confirmat screws.

# THE WEATHERSTRONG DIFFERENCE

#### **UNMATCHED DURABILITY**

What is All-Weatherboard® Composite Material?

WeatherStrong uses All-Weatherboard® composite material, renowned for its resilience against moisture, rot, and termites. This composite is crafted from phenolic resins, zinc borate, wax, and wood fibers through a patented process. The result is a product that stands strong against the elements, providing long-lasting durability for all your outdoor kitchen and storage needs. All-Weatherboard® is finished with a decorative laminate and sealed with waterproof PVC edging, ensuring it stays beautiful and functional year after year.

#### **EXPOSED SIDES & BACKS PROTECTION**

Outdoor environments can be harsh, but WeatherStrong cabinets are up to the task. Exposed backs and sides will need to be protected by adding High-Density Polyethylene (HDPE) end panels and are field installed. This not only adds an extra layer of protection but also helps maintain the structural integrity and longevity of your cabinets, essential for withstanding direct sunlight and weather elements.

#### **EASY MAINTENANCE**

Simple Clean-Up

Keeping your WeatherStrong cabinets looking their best is hassle-free. A quick wash with water and a soft cloth or sponge is all it takes. For tougher spots, a mild dishwashing liquid and a soft bristle brush will do the trick, making maintenance a breeze. See page 50 for details.

## **QUALITY CONSTRUCTION**

**Factory Built** 

Every WeatherStrong cabinet is built to order, arriving ready for installation. We use a combination of waterproof ¾" All-Weatherboard® composite material, HDPE, precision dowels, and Confirmat stainless-steel screws. This combination guarantees a sturdy construction with excellent strength, ensuring your cabinets will last through the seasons.

#### THOUGHTFUL DESIGN

Limitations for Optimal Use

While our Designer Solid and Designer Woodgrain finishes are perfect for outdoor settings, they are not recommended for areas where surface temperatures exceed 265°F. This ensures that your finishes stay pristine, and your cabinets remain durable.

#### **SALT WATER ENVIRONMENTS**

Living near the coast? WeatherStrong has you covered. Oceanfront environments with salt air and sea spray require regular maintenance to prevent rust. Our stainless-steel components are designed to withstand these conditions, ensuring your cabinets look great and function perfectly for years. Regular cleaning of stainless-steel surfaces helps maintain their resistance to corrosion and staining.

#### VERSATILE INSTALLATION

Installation to Exterior Walls

WeatherStrong cabinets can be seamlessly integrated into both outdoor and indoor spaces. For exterior installations on stucco, brick, or concrete walls, we recommend using stainless steel Tapcon® fasteners. These ensure a secure attachment, refer to Tapcon® for specific recommendations for the number of fasteners needed based on cabinet size. This will guarantee stability and safety.

#### THE LIFETIME LIMITED WARRANTY

We stand by our products with a Lifetime Limited Warranty, giving you peace of mind that your investment is protected. Our commitment to quality means that you can trust your WeatherStrong cabinets to withstand the test of time, no matter what the weather brings.

#### **MADE IN THE USA**

WeatherStrong cabinets are proudly made in the USA, ensuring high-quality craftsmanship and supporting local manufacturing.

Discover the WeatherStrong difference for yourself and transform your outdoor space with confidence and style. Experience unparalleled durability, easy maintenance, and quality construction that stands up to the elements, all backed by our Lifetime Limited Warranty.

# **DOOR STYLES**

#### **DAYTONA**

- 5/8" thick flat panel door a with an extended stile cottage-inspired routed center panel design in a durable & color through High Density Polyethylene finish
- Fully concealed stainless steel, soft close hinges
- Side mounted, ball bearing, stainless steel, soft close drawer runners
- Decorative hardware required and sold separately. See page 39 for details.
- Lifetime Limited Warranty

#### MIAMI

- 5/8" thick flat panel door in a durable & color through High Density Polyethylene finish
- Fully concealed stainless steel, soft close hinges
- Side mounted, ball bearing, stainless steel, soft close drawer runners
- Decorative hardware required and sold separately. See page 39 for details.
- Lifetime Limited Warranty

#### **SANIBEL**

- 5/8" thick flat panel door a with an extended stile shaker-inspired routed center panel design in a durable & color through High Density Polyethylene finish
- Fully concealed stainless steel, soft close hinges
- Side mounted, ball bearing, stainless steel, soft close drawer runners
- Decorative hardware required and sold separately. See page 39 for details.
- Lifetime Limited Warranty

#### **TAMPA**

- 5/8" thick flat panel door a with an extended stile louver-inspired routed center panel design in a durable & color through High Density Polyethylene finish
- Fully concealed stainless steel, soft close hinges
- Side mounted, ball bearing, stainless steel, soft close drawer runners
- Decorative hardware required and sold separately. See page 39 for details.
- Lifetime Limited Warranty

# **IMPORTANT - GRILL AND SIDE BURNER BASES**

# **INSULATING JACKET REQUIRED**

Customer Responsibility:

Grill, griddle, and side burner bases must be installed with the grill manufacturers specified insulation jacket to maintain warranty coverage.

Grill Insulating Jacket

Side Burner Insulating Jacket

# **GRILL CABINETS**

Grill Cabinet Coding					
GB 36 30 IB					
GB Cabinet Code	36 Width	30 Depth	IB Full Back		

### **FEATURES**

- The face plate is modified in field to accept the respective insulating jacket used with the gas grill
- Includes 'Sure Level' polymer legs, shipped loose for field installation and leveling
- Stainless steel handles are required and sold separately. See page 39 for details.
- Side Burner and Grill Base cabinet sides feature two vent cutouts, designed to promote air flow through the cabinetry, and to prevent any possible buildup from a propane or natural gas leak

#### **PLEASE NOTE**

All built in grill heads require an insulating jacket. Please consult your grill manufacturer for the appropriate model.

Consult your grill manufacturer for the appropriate model.

## **GRILL DOUBLE DOOR BASE**

Item Number	Width	Depth	Height
GB36IB	36	27	34.5
GB3630IB	36	30	34.5

GB4230IB	42	30	34.5
GB48IB	48	27	34.5
GB4830IB	48	30	34.5

\*Grill cabinets are manufactured with two full upper face plates that will need to be field modified to accept the insulating jacket used with the gas grill. Under no circumstance should a grill be installed without the appropriate insulating jacket specified by the appliance manufacturer or warranty is voided.

# **GRILL CABINETS**

# EXTENDED APRON GRILL DOUBLE DRAWER BASE

Item Number	Width	Depth	Height
GBP48IB	48	30	34.5

# **GRILL FOUR DOOR BASE**

Item Number	Width	Depth	Height
GB60IB	60	30	34.5

The extended apron grill base is engineered for grills with insulating jackets that require a taller apron cut. Hybrid grills and Pellet grills are just a couple examples. The apron space on this grill is 18" in height and will need to be cut on the job site. Please consult your grill manufacture install instructions for the correct height required. Two drawers at the bottom allow for storage of grill pellets or other grilling items.

# **SIDE BURNER CABINETS**

Side Burner Cabinet Coding				
SBB 18 27 LIB				
SBB	15	27	LIB	
Cabinet Code	Width	Depth	Hinging	

#### **FEATURES**

- The face plate is modified in field to accept the respective insulating jacket used with the side burner
- 3/4" All-Weatherboard® composite material cabinet construction
- Includes 'Sure Level' polymer legs, shipped loose for field installation and leveling
- Fully integrated back panel
- Available in all door styles and finishes

#### **PLEASE NOTE**

All built in side burners require an insulated jacket. Please consult your side burner manufacturer for the appropriate model.

Stainless steel handles are required and sold separately. See page 39 for details.

\*Grill and side burner cabinets are manufactured with two full upper face plates that will need to be field modified to accept the respective insulating jacket used with the gas grill or side burner.

Under no circumstance should a grill or side burner be installed without the appropriate insulating jacket specified by the manufacturer of the appliance.

#### **FEATURES**

- Two full depth-adjustable shelves
- 3/4" All-Weatherboard® composite material cabinet construction
- Fully integrated back panel
- Includes 'Sure Level' polymer legs, shipped loose for field installation and leveling
- Available in all door styles and finishes
- Stainless steel handles are required and sold separately. See page 39 for details.

#### **BASE CABINETS**

Base cabinet construction features a 30" high cabinet box, which must be mounted on-site on 4  $\frac{1}{2}$ " high 'Sure Level' adjustable polymer legs. Legs are adjustable from 4" to 5  $\frac{1}{2}$ " high. Optional stainless steel adjustable legs are available as an accessory. Optional snap on matching toe kick panels are available 6" high x 96" long, for site modification and installation.

Our base cabinets feature a full-height ¾" thick enclosed All-Weatherboard® composite material back panel. Base cabinets can be installed as a freestanding island, or as a peninsula extending from a wall.

#### **FEATURES**

- 3/4" All-Weatherboard® composite material cabinet construction
- Fully integrated back panel
- Includes 'Sure Level' polymer legs, shipped loose for field installation and leveling
- Available in all door styles and finishes
- 316 stainless steel handles are required and sold separately. See page 39 for details.
- Top drawer front is 6" high
- On three drawer bases bottom drawer fronts are 12" high
- On four drawer bases bottom drawer fronts are 8" high

## **BASE CABINET TIP**

Base cabinets are great for use as a free standing island and in wide open areas. The fully integrated back panels provide a factory built barrier against debris entering the cabinet. Exposed backs and sides require the use of Base or Island Panels. See pg 33-34 for size availabilty.

\*27" deep base cabinets have the same roll-out tray as the 24" deep cabinets

#### **DESIGN TIP**

When creating a corner, where there is a grill or other appliance close, make sure to leave enough clearance. This can be designed using fillers to create the corner. This will allow your adjacent drawers/doors to open and not collide with the appliance.

- Single full depth adjustable shelf

#### **MEASUREMENTS TO KEEP IN MIND**

It is important to make sure there is enough room between appliance and walkways.

- Grill/Pizza oven 24" on one side and 12" on the other counter space is recommended
- Sink 18" on each side
- Refrigerators- 15" of counter space around or above
- Side burners/ cooktops- 12" on each side
- Minimum workspace 36" w x 24" d
- Minimum storage 21" linear storage.

These are recommendations to help keep your installation practical.

## "ZONES" TO KEEP IN MIND

When designing your kitchen you want to make sure each of your appliances are easily accessible. To help in doing this it's important to think in zones.

- Hot Zone: This is the heart of the kitchen, where you will have heat admitting appliances.
- Dry Zone: This is a food preparation area. You will want an area of counter space that is near the Hot Zone.
- Wet Zone: Area with your sink that can be near your Dry zone. This zone should not infringe on your prep station
- Cold Zone: This will be your refrigerator or cold storage appliances. This zone should be kept away from the Hot Zone.

- Top drawer front is 6" high
- Bottom three drawer fronts are 8" high
- Drawers feature soft close, side mounted ball bearing stainless steel drawer glides

### **HOW MUCH BUFFER SPACE WILL I NEED?**

In addition to the three feet of prep space, you'll need to consider the amount of "landing space" for each appliance in your outdoor kitchen to ensure it's a safe distance from walkways and from other appliances. Our recommendations are:

- Sink: 18" on each side
- Refrigerator: 15" of counter space above or around the fridge
- Side burner/cooktop: 12" on each side

Of course, these "buffer zones" can contribute to the 36" of uninterrupted prep space mentioned earlier. Just be sure to consider the practical side of getting everything to fit, such as whether you want underthe-counter appliances such as a mini refrigerator to be right at your legs where you'll be doing the bulk of your prep work.

- Two reduced depth adjustable shelves
- 3" filler, 3" & 6" overlay fillers included
- Door width is 12", opening is 10 1/2"

**BLIND BASE INSTALLATION TIP ON PAGE 24** 

#### **BLIND BASE TIP**

The Blind Base cabinet is 36" wide. It must be installed from 3" to 9" away from the adjacent wall. This allows the door full clearance and provides a flexible installation range. From the adjacent wall to the far edge of the cabinet, a minimum width of 39" to a maximum width of 45" is required.

- Gray All-Weatheboard® construction

Wall Cabinet Coding						
W 30 09 15 IB						
W	30	09	15	IB		
Cabinet Code	Width	Depth	Height	Full Back		

#### **FEATURES**

- 3/4" All-Weatherboard® composite material cabinet construction
- Fully integrated back panel
- 316 Stainless steel handles are required and sold separately. See page 39 for details.

#### **PLEASE NOTE**

24" high wall cabinets measure 23 3/4"

If the sides of the wall cabinet will be exposed, make sure to order Matching Wall End Panel to cover the sides.

Do not place bridge cabinets over a heat emitting appliance, even if there is a range hood. The heat could damage the front of the cabinet.

#### **DESIGN TIP**

Wall cabinets can provide excellent additional storage.

It is important to space plan when using wall cabinets to ensure there is proper distance from your heat emitting appliance and the start of your wall cabinet run.

If you have an area where you need a narrow storage, you can use a wall cabinet. Simply order an extra set of legs or have the installer build a platform under and cover with toe kick material. Much like you would do in an indoor kitchen.

As the cabinets are full overlay frameless, fillers must be used if the cabinet is going against a side wall.

# LEVELING LEG INSTALLATION - PLASTIC LEGS

# **LEVELING LEG ASSEMBLY**

Simple assembly is required for each Leveling Leg

For easier handling and to avoid damage remove doors and drawers from the cabinet. Then, using two or more people, place the cabinet upside down on a protected surface.

1. Place the 2 front leg brackets 3-1/2" from the front edge with the support plate overlapping the end panel – 1/4" from the outer edge.

2. Place the 2 back leg brackets 1" from the back edge with the support plate overlapping the end panel – 1/4" from the outer edge.

4. Adjust the leveling legs up or down to bring the cabinet to a level plumb position. Use of the longer stems may be needed in this application.

# **TOE KICK APPLICATION - PLASTIC LEGS**

1. Lay the trimmed Toe Kick panel in front of the cabinet against the Leveling Legs. Mark the location of each Leg on the back of the panel. Clips are not needed on all Leg locations, but enough for a secure hold

- 2. Center the Clip Plates half way up the height of the panel, screw into place. Then slide a Clip into each Plate.
- 3. Align the Panel and push the clips onto the Legs

# LEVELING LEG INSTALLATION - STAINLESS LEGS

# STAINLESS STEEL LEVELING LEG ASSEMBLY

Simple assembly is required for each Leveling Leg

For easier handling and to avoid damage remove doors and drawers from the cabinet. Then, using two or more people, place the cabinet upside down on a protected surface.

3. Use a Phillips bit to attach the legs with the stainless steel screws supplied. DO NOT OVERTIGHTEN!

2. Place the 2 back leg brackets 1" from the back edge with the support plate overlapping the end panel – 1/4" from the outer edge.

4. Adjust the leveling legs up or down to bring the cabinet to a level plumb position.

# TOE KICK APPLICATION

1. Lay the trimmed Toe Kick panel in front of the cabinet against the Leveling Legs. Mark the location of each Leg on the back of the panel. Clips are not needed on all Leg locations, but enough for a secure hold

- 2. Center the clips half way up the height of the toe kick panel, screw into place. Then screw the clip directly onto the toe kick panel.
- 3. Align the Panel and push the clips onto the Legs

# **REQUIRED TOOLS**

- Level
- Plastic Shims (for leveling if necessary)
- Dril
- Tapcon® 3/16" x 2-3/4" Stainless Steel Screws
- 1/4" Stainless Steel Washers
- Tapcon® 3/16" Drill Bit (pilot holes in concrete typically is provided with screws)
- 3/16" Wood Drill Bit (pilot holes in cabinet backs or installation rails)
- 1/8" Wood Drill Bit (pilot holes in cabinet sides to join them together)
- Phillips Head Screwdriver
- Clamps (with rubber pads)
- Saw (circular or table) to trim matching end panels and toe kick fillers
- Carpenter's Square
- Tape Measure
- Extension Cord
- Step Ladder (at least 6' if installing wall cabinets)

### **BEFORE YOU BEGIN:**

Check your new cabinetry against your design plan to ensure that you have all required cabinets, moldings, fillers, and accessories to complete the installation.

### **SAFETY FIRST:**

To avoid injury, explosion, or shock, make sure that all water supplies, gas supplies, and pertinent circuit breakers are shut off. Double check electrical using circuit tester to confirm power is off. If you are uncertain that utilities have been properly shut off, consult your utility company or service professional.

### **CAUTION:**

It is essential that you use the recommended screws for your cabinetry installation. Under no circumstances should you use nails or drywall screws as they do not have the strength or holding power to ensure that cabinets stay on the wall. Failure to use specified screws will render warranty null and void.

Installation detailed in this manual is for concrete block construction only. Attachment to any other wall types will require locating the wood or steel studs behind the wall. Consult with your local home center, hardware store or installation specialist for recommended fasteners.

# LEVELING THE CABINETS

Leveling the cabinets is the most important part of installation, to ensure doors align properly and countertop sets evenly. They are to be level and square. Make sure your leveling legs are installed and adjusted. Review separate leveling leg instructions.

Be sure to level your cabinets in all three directions:

- 1. Front to Back
- 2. Vertically
- 3. Horizontally

# ANCHORING TO CONCRETE BLOCK WALLS

Prior to installation you will find it easier to handle the cabinet with the doors and drawers removed.

Hinges can be removed from the hinge plate by simply pressing in the release button on the end of the hinge, and pulling away from the cabinet. They are re-attached by hooking the hinge to the plate and snapping the pressure release into place.

 Pull the drawer out until it stops. Each drawer runner has a small plastic release tab. One tab will point up and the other will point down. Holding the drawer box on each side, push the tabs in the opposite direction from which they're pointing and carefully pull the drawer box out. Carefully push the runners back into the cabinet.

# **ANCHORING TO CONCRETE BLOCK WALLS**

- 1. Each Wall Cabinet requires 4 wall anchors (2 top, 2 bottom).
- 2. Screws should be placed in each corner approximately 2" from the end panels.
- 3. Pre-drill the pilot holes before you place the cabinet against the wall with a standard 3/16" drill bit.
- 4. Then put the cabinet in place. In each corner use the 3/16" Tapcon® bit through the pilot holes to

- create starter holes into the concrete block, for the Tapcon® anchors.
- 5. Remove the cabinet to complete drilling the pilot holes into the concrete block. When complete, place the cabinet against the wall.
- 6. Once you confirm the cabinet is level and square, use Tapcon® 410 Stainless Steel 3/16" x 2-3/4" fasteners, with a ¼ stainless steel washer to secure the cabinet to the wall.

# **FASTENING CABINETS TOGETHER**

As you install your Base and Wall cabinets, you should fasten the cabinets together along the front edge. This will help reduce gaps between cabinets and maintain alignment.

- 1. To secure cabinets together, a 1-¼" stainless steel screw is used. (Model #WSSS1.25-Screw Kit) Pre-drill a 1/8" pilot hole in one end panel. Try to locate the joining screws where they will not be visible, above the drawer runner or behind the hinge plate.
- 2. Use clamps to hold cabinet panel in alignment. Insert the screw through the pilot hole into the second cabinet end panel be careful not to countersink the head.

# ADJUSTING DOOR ALIGNMENT

# **DOOR ALIGNMENT**

WeatherStrong Cabinets feature a 6-way adjustable hinge that will allow you to adjust and align all the doors after installation

- 1. The center screw will adjust the door from side to side.
- 2. The top and bottom screws in the hinge plate will allow adjustment up and down.
- 3. The back screw will adjust the door in and out. Please Note: These are soft-close hinges and will close slower at first.

# TO REINSTALL THE DRAWERS

- 1. Extend both drawer runners all the way out of the cabinet box.
- 2. Carefully reengage the metal drawer box profiles on both sides.
- 3. Once both profiles are engaged about 1" carefully push the drawer all the way into the cabinet.

# **BAR RISER KIT**

If your design includes a Bar Riser Kit (BRK), the information below will help you to install it.

We recommend installing the cabinet legs after you have attached the bar riser to the base cabinet.

- 1. Lay out the cabinets that make up your kitchen and locate where the bar riser kits are going to be placed.
  - Note: Some BRK's may overlap two cabinets, so follow your floorplan carefully.
- 2. Attach the BRK to the base cabinet(s) by lining up the bottom of the bar riser with the bottom of the cabinet.
- 3. Attach the bar riser using 1-1/4" stainless steel screws (WSSS1.25-ScrewKit) by screwing from the inside of the cabinet through the rear hanging rails.
- 4. Once the BRK is attached, you can install the adjustable legs and level the cabinet/riser.

### **BAR RISER KITS**

- 3/4" All-Weatherboard® composite material cabinet construction
- 4" deep by 36" high
- Requires BTP for field installation to match the cabinet doors

Bar Risers are 4" deep by 36" high and are available in 3" width increments from 12" to 48". When securely attached to the back of a 34-1/2" high base cabinet, the top of the riser will be approximately

40-½" from the floor. These field installed kits feature a full-height ¾" thick enclosed All-Weatherboard® composite material back panel and can only be paired with the Island Back base cabinets. These kits will turn almost any base cabinet into a two-level bar.

Please Note: Exposed cabinet sides and backs MUST be covered by a matching end/island panel.

# **GRILL BASES AND SIDE BURNER CABINETS**

Grill Bases and Side Burner Cabinets have a few extra steps that make up the proper installation.

First and foremost, if you are installing a drop-in grill or side burner in your cabinets, you **MUST** first install an insulated jacket before inserting the heat admitting appliance. This protects your cabinets from the extreme heat and protects your limited warranty.

Please Note: You must purchase the insulated jacket from the manufacturer of the gas/heat appliance. Please follow the manufacturer's instructions on how to properly support your appliance and insulated jacket inside the cabinet.

### **CABINET MODIFICATION:**

- 1. Your grill base or side burner cabinet comes with two panels in the upper, apron part of the cabinet.
- 2. Mark the required cut-out necessary to install the insulated jacket and the gas appliance. Refer to the specification and installation guides supplied by the appliance manufacturer, or use a template if provided. Remember to account for the countertop thickness.
- 3. Carefully cut out the required space on the cabinet apron and decorative overlay panel.
- 4. Place the insulated jacket into the cutout to ensure a proper fit.
- 5. Fabricate a support brace, inside the cabinet, based on the appliance manufacturer's recommendation.
- We recommend hiring a licensed professional to install the gas appliances and the insulated jacket.

### **GRILL DOUBLE DOOR BASE**

- The face plate is modified in field to accept the respective insulated jacket used with the gas grill
- 3/4" All-Weatherboard® composite material cabinet construction
- Fully integrated back panel
- Includes 'Sure Level' polymer legs, shipped loose for field installation and leveling
- Available in all door styles and finishes
- Stainless steel handles sold separately

Please Note: All built-in grill heads require an insulated jacket. Please consult your grill manufacturer for the appropriate model.

### PROPER VENTING:

All Base Cabinets have precut vent slots in the cabinet sides. These provide airflow through the cabinetry and enable any excess gas to vent out the end of the run. Matching Base End Panels are available with decorative vent grills (see page 33)."

# MATCHING ENDS AND ISLAND BACK PANELS

Matching End Panels and Island Back Panels are used to cover any exposed cabinet sides or backs. These panels are manufactured from the same HDPE material as the cabinet doors and drawer fronts.

Matching End Panels are oversized and will not match the exact measurements of your cabinets. This allows them to be trimmed to follow the pitch of the floor of your outdoor space, which is often sloped. Trimming HDPE will not leave a raw edge as the material color is through and through.

Matching Panels should be trimmed to fit after the cabinets are permanently set and leveled.

### PANEL INSTALLATION:

- 1. Refer to your floorplan or cabinet layout to determine which panels go in which location.
- 2. Measure each panel location from front to back and top to bottom. Use these measurements to mark your panel.
- 3. Once the panel is marked, use a table saw or circular saw to trim the panel to size.
- 4. Use C-clamps or Quick-Grips to hold the panel in place during installation.

- a. Screws (WSSS1.25-Screwkit) can be used to secure the panels to the cabinets.
- b. If using Screws make sure to drill pilot holes into the cabinet before placing the permanent screw.
- 5. Attach the panel by screwing the panel from inside the cabinet box.

Please Note: Panels that will cover the side of a cabinet with a Bar Riser Kit attached will need to have the profile of the side of the cabinet combination cut out.

Panel as shipped

Panel after cutting on job site without heat component

Panel after cutting on job site with heat component

# **INSTALLING HARDWARE:**

Hardware is the final step of your cabinet installation. This is done after the drawers are back in place and the doors have been replaced and adjusted to be square.

Placement of your hardware is per your choice and a template can be purchased from your local hardware store.

### **INSTALL:**

- 1. Mark your doors/drawer fronts with a pencil or small marker where the screw holes will go.
  - Make sure to carefully measure where these holes will be drilled to ensure proper placement.
- 2. Drill the screw holes using the 3/16" drill bit.
- 3. Attach the hardware using the screws provided in the hardware bag, from the inside of the door/drawer out into the piece of hardware.

# **CARE AND USE GUIDE**

### **AFTER INSTALLATION CARE**

After your cabinets have been installed, wipe down all exteriors with a damp cloth to remove dust.

Clean Up: Wash WeatherStrong with water and a soft cloth or sponge. A mild dishwashing liquid can be used if needed. For tougher to clean spots, wash with Simply Green All-Purpose Household Cleaner. A soft bristle brush may be used if needed.

### **EVERYDAY CARE**

Salt Water Environments: Oceanfront environments with salt air and sea spray will require regular maintenance and cleaning to prevent rust from forming on the handles, hinges and drawer runners. Clean stainless steel surfaces several times a month to keep the chemical reaction, from the salt, from gaining a foothold on the hardware. With regular cleaning, your cabinets will look like new for many years. To achieve maximum corrosion and stain resistance, the surface of the stainless steel must be kept clean.

**NEVER** use abrasive cleaners, scouring pads or powdered cleansers.

# **HARDWARE CARE**

Use mild soap and warm water to clean door, drawer knobs and pulls. Thoroughly dry hardware surfaces after cleaning. **DO NOT** use silver or brass polish.

### **GRILL & SIDE BURNER CABINET MODIFICATIONS**

Grill and side burner cabinets are manufactured with two full upper face plates that will need to be field modified to accept the respective insulated jacket used with the gas grill or side burner.

The second matching panel will be shipped loose for ease of modification and installation. It can be attached with stainless steel screws or a suitable construction grade adhesive. Under no circumstance should a grill or side burner be installed without the appropriate insulated jacket specified by the manufacturer of the appliance.

# **HEAT APPLIANCES**

Free-standing grills with adequate space from direct heat are recommended or grills with insulated jacket specified by the grill manufacturer can be installed in WeatherStrong cabinets.

Insulated jackets are **required** for heat admitting appliances being installed in WeatherStrong

# **LIGHT EXPOSURE**

Cabinet sides and backs that will be exposed to direct sunlight and other weather elements MUST be covered by a matching end panel in coordinating High Density Polyethylene (HDPE). Failure to install these protective panels will void the cabinet warranty.

# **DRAWER REMOVAL**

**STEP 1**Fully open drawer and remove contents.

To re-install, align drawer slides and gently push drawer closed. Locking tabs do not need to be pressed.

STEP 4

With drawer fully extended, locate slide release tab on left side and push up to release.

STEP 2

Open and close drawer several times to ensure proper alignment.

STEP 3
Locate release
tab on right side
and push down to
release. Pull drawer
forward to remove.

# CARE AND USE GUIDE

# **ROLL-OUT TRAY RELOCATION/INSTALLATION**

# STEP 1

Install two Spacers on each End Panel just above the lower hinge, as shown, using two Euro Screws per Spacer. If applicable repeat steps to install an additional upper Rollout Tray at the designated holes shown above.

# STEP 2

Remove Drawer Runners from packaging and extend the runners. While pressing down on the white tab pull Smaller Runner Member (A) apart from Larger Runner Member (B).

# STEP 3

Attach the Larger Runner Members (B) to the Spacers using two Euro Screws per runner. To access the attachment holes, you will need to extend the runner mechanism, as shown.

# STEP 4

Carefully slide the Rollout Tray into the Larger Runner Members (B) by inserting the Smaller Members (A) into the plastic guides at the front of the Larger Members. You should hear a 'click' when fully inserted.

# CARE AND USE GUIDE

# **DOOR POSITION ADJUSTMENT**

### **HEIGHT**

Loosen two screws and adjust door to desired position. Re-tighten all screws.

# **SIDE TO SIDE**

Using a Phillips screwdriver, rotate front screw to move the door to the desired position.

# **DEPTH**

Using a Phillips screwdriver, rotate back screw to move the door to the desired position.

# **HEIGHT**

For vertical door adjustment loosen center screw on each hinge. Set door at desired height. Retighten each screw.

# **SIDE TO SIDE**

Rotate front screw for horizontal door adjustment

# DEPTH

Rotate back screw for front to back door adjustment

# **SHELFT RESTS**

Adjustable shelve sit on sturdy clear polymer shelf rests.

# DRAWER FRONT ADJUSTMENT

If additional adjustment is required, loosen screws and twist drawer front for proper alignment. Tighten screws securely.

# Limited Warranty

Ideal Cabinetry® (warrantor) warrants to the original consumer purchaser, that the WeatherStrong® branded outdoor cabinets will be free from defects in material and workmanship under normal residential use. The warranty for the Designer Series is for your lifetime as long as you own the cabinetry and is not transferable. The warranty for the Standard Series is for a period of five years as long as you own the cabinetry and is not transferable. Both warranties are expressly limited to the cabinet carcass, doors, drawers, and shelves. The warranty on stainless steel hardware, including screws, handles, hinges, drawer runners and adjustable legs is five years. Proof of purchase is required. Items not listed in this warranty are not covered by this warranty. No other warranty express or implied, is applicable to this product. Separate components not produced by Ideal Cabinetry such as countertops, sinks, grills, and appliances are not covered by this warranty. Manufacturers installation guidelines must be followed including ventilation requirements.

This warranty does not cover damage resulting from normal wear, natural aging, accident, misuse, excessive heat, or lack of reasonable and necessary maintenance and service; nor does it warranty the improper installation or unauthorized repair, alteration, modification, or defects in the product when the product is installed. For Designer Series cabinetry, excessive heat is a surface temp >265°, for Standard Series cabinets, excessive heat is a surface temp >140°. This warranty is limited to the repair or replacement of the defective part at the sole discretion of warrantor.

Although Ideal Cabinetry uses the best available materials and does extensive testing for finish endurance, some fading may occur and is considered normal. For coastal locations, some deterioration is considered normal wear in this environment.

It is our option to provide repair parts or replace with functionally equivalent product. Return of product may be required for replacements. Such repair parts or replacement shall be at warrantor's expense, but customer shall bear all other expenses, including, but not limited to, cost of removal, transportation, re-installation, communication, and any special service required by customer such as, overtime labor, etc. Ideal Cabinetry shall not be liable for the loss of use of the product, inconvenience, loss or any other damages, direct or consequential, arising out of the use of or inability to use the product. Due to the nature of the product, replacement product may vary from original purchased product.

In the event of a WeatherStrong® brand warranted product performance issue, submit request including proof of purchase documentation, specific description of warranty issue (include photos) in writing to:

Warranty Department 210 Century Boulevard Bartow, FL 33830

Ideal Cabinetry reserves the right to alter design, specifications, and material without obligation to make changes to product previously manufactured.

EXCEPT TO THE EXTENT PROVIDED BY APPLICABLE LAW, ALL IMPLIED WARRANTIES, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED IN DURATION TO THE SHORTER OF THE PERIOD PROVIDED BY LAW OR THE PERIOD OF THIS WARRANTY, AND UNDER NO CIRCUMSTANCE SHALL IDEAL CABINETRY BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES SUSTAINED IN CONNECTION WITH THE PRODUCT. THE EXPRESS WARRANTY ABOVE CONSTITUTES THE ENTIRE WARRANTY AND IS IN LIEU OF ALL OTHERS EXPRESSED OR IMPLIED.

Some states do not allow the exclusion or limitation of incidental or consequential damages, or limitation on how long an implied warranty lasts, therefore, the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state.

# **INDEMNITY**

Ideal Cabinetry shall not be liable for either its failure to perform or its delays in performance hereunder arising out of or resulting from causes beyond its control, including but not limited to, acts of God, acts of Representation, acts of Government, conflicts, wars, fires, floods, epidemics, quarantine, strike, freight embargoes, weather, or default by suppliers due to any such causes.
